PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with production experience in React.js and Next.js, and a track record of independently building and shipping complete SaaS applications end-to-end — from database design and authentication to payment integration and email automation. Over a year of production experience with TypeScript, Node.js, and Express.js, working across MongoDB and PostgreSQL, with hands-on AI API integration (OpenAI, Google Gemini). Comfortable owning a feature or product from concept through deployment, and quick to pick up new tools and frameworks.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3

Backend & APIs: Node.js, Express.js, RESTful API Design & Integration, Server Actions

Database: MongoDB, PostgreSQL, Prisma/Drizzle ORM, SQL Queries

Auth & AI: JWT Authentication, OAuth-Based Providers (Clerk, NextAuth), AI API Integration (OpenAI, Google Gemini)

Real-Time & Automation: React Flow, Liveblocks (real-time collaboration), Trigger.dev (background jobs), Browser Automation (Stagehand, Browserbase)

Practices & Tools: Git, GitHub, Code Reviews, Debugging, Postman

PROFESSIONAL EXPERIENCE

Frontend Developer Intern — NeoSao Services Pvt. Ltd.

Jul 2025 – Jun 2026 | Kolhapur, India

- Delivered responsive, production-grade client applications using React.js, Next.js, TypeScript, and Tailwind CSS across 15+ client-facing projects.
- Developed and maintained reusable React/Next.js component libraries, reducing duplicate UI code and speeding up feature delivery.
- Integrated REST APIs end-to-end, connecting frontend interfaces to backend services and handling 30+ distinct data workflows (orders, auth, admin CRUD, vendor management).
- Optimized frontend performance and implemented Server-Side Rendering (SSR) patterns, improving page load behavior and SEO-readiness for client applications.
- Collaborated within an Agile development team, participating in code reviews, Git-based version control workflows, and cross-functional delivery of production-ready features.

PROJECTS

FlowForge — Visual Browser Automation Platform | Next.js 16, React 19, TypeScript, React Flow, Liveblocks, Trigger.dev, Neon PostgreSQL

- Built a production-grade browser automation SaaS platform with a drag-and-drop, node-based workflow editor powered by React Flow.
- Implemented real-time multiplayer collaboration with live cursors using Liveblocks, and durable background workflow execution via Trigger.dev.
- Architected a type-safe data layer using Drizzle ORM and Neon PostgreSQL, with Clerk-based organization authentication and subscription-based feature gating.

GitHub: github.com/YashLagare/FlowForge **Live:** flow-forge-ebon.vercel.app

InvoicePilot — Invoice Management Platform | Next.js, TypeScript, Node.js/Prisma, PostgreSQL, NextAuth, Recharts

- Built a full-stack invoice management platform handling end-to-end invoice lifecycle (create, edit, mark-as-paid, delete) using Next.js API routes with PostgreSQL and Prisma ORM.
- Engineered magic-link authentication via NextAuth, eliminating password-based login friction, and built dashboard analytics with Recharts-based revenue visualization.
- Automated server-side PDF invoice generation with jsPDF and transactional email delivery via Nodemailer, reducing manual invoice-sharing steps from 3 to 1.

QuickBite — Multi-Role Food Ordering & Delivery Platform | React, Node.js, Express.js, MongoDB, Socket.IO, Redux Toolkit

- Built a production-style multi-role platform (User, Shop Owner, Delivery Partner) with a modular MVC backend using Node.js, Express.js, and MongoDB.
- Implemented real-time order tracking (Pending → Preparing → Out for Delivery → Delivered) using Socket.IO, with Redux Toolkit managing persisted cart and session state.
- Integrated Razorpay payments with signature verification and geo-based shop discovery using MongoDB 2dsphere indexing.
