PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with production experience building and shipping complete SaaS applications end-to-end — from authentication and database design to AI integration, payment processing, and email automation. Over a year of hands-on experience with TypeScript, Next.js, Node.js, MongoDB, and PostgreSQL, with direct AI API integration (OpenAI, Google Gemini). Comfortable owning features from concept through deployment and quick to learn new tools.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3
Backend & APIs: Node.js, Express.js, RESTful API Design & Integration, Server Actions
Database: MongoDB, PostgreSQL, Prisma / Drizzle ORM, SQL Queries
Auth & State: JWT Authentication, OAuth Providers (Clerk, NextAuth, Better Auth), Redux Toolkit, Zustand
AI Integration: OpenRouter API, OpenAI API, Google Gemini API, Prompt Engineering
Practices & Tools: Git, GitHub, Code Reviews, Debugging, Postman

PROFESSIONAL EXPERIENCE

Frontend Developer Intern — NeoSao Services Pvt. Ltd. Jul 2025 – Jun 2026 | Kolhapur, India

- Delivered responsive, production-grade client applications using React.js, Next.js, TypeScript, and Tailwind CSS across 15+ client-facing projects.
- Developed and maintained reusable React/Next.js component libraries, reducing duplicate UI code and speeding up feature delivery.
- Integrated RESTful APIs and third-party services end-to-end, connecting frontend interfaces to backend systems and handling 30+ distinct data workflows (orders, auth, admin CRUD, vendor management).
- Implemented Server-Side Rendering (SSR) patterns and optimized frontend performance, improving page load behavior and SEO-readiness for client applications.
- Collaborated within an Agile development team, participating in code reviews and Git-based version control workflows for cross-functional, production-ready feature delivery.

PROJECTS

FlowForge — Workflow Automation Platform | *Next.js 16, React 19, TypeScript, React Flow, Trigger.dev, PostgreSQL*

- Built a production-grade workflow automation SaaS with a drag-and-drop node-based workflow editor powered by React Flow, including advanced Loop/Iterator nodes for batch processing.
- Implemented real-time multiplayer collaboration with live cursors via Liveblocks, and durable background workflow execution using Trigger.dev with cron-based scheduling.
- Architected Clerk-based organization auth with role-based access, subscription-based feature gating, and a type-safe data layer using Drizzle ORM and Neon PostgreSQL.

Docsy — AI Document Workspace | *Next.js 16, TypeScript, PostgreSQL, Prisma, Better Auth, Stripe, AI Integration*

- Built a multi-tenant SaaS document workspace where users create isolated workspaces, upload documents, and receive streamed AI-generated answers with source references using LLM integration.
- Architected workspace-scoped document and chat management with usage tracking, server-controlled subscription entitlements, and Stripe billing for plan management.
- Implemented secure authentication and organization membership using Better Auth, transactional email workflows via Resend, and PostgreSQL persistence through Neon and Prisma ORM.

QuickBite — Multi-Role Food Ordering & Delivery Platform | *React, Node.js, Express.js, MongoDB, Socket.IO, Redux Toolkit*

- Built a production-style multi-role platform (User, Shop Owner, Delivery Partner) with a modular MVC backend using Node.js, Express.js, and MongoDB.
- Implemented real-time order tracking (Pending → Preparing → Out for Delivery → Delivered) using Socket.IO, with Redux Toolkit managing persisted cart and session state.
- Integrated Razorpay payments with server-side signature verification, and geo-based shop discovery using MongoDB 2dsphere indexing.
